Profile

Detail-oriented IT professional with expertise in networking, full-stack development, and data visualization. Skilled in building scalable web applications, managing secure network systems, and transforming complex data into clear, actionable visual insights for informed decision-making.

WORK EXPERIENCE

Fidrox Technology

System Engineer

Mar-2026 - Present

Working in a third-party role at Adani Defence & Aerospace.

- Integrated and supported Genetec Security Centre for IP cameras and access control by ensuring secure, reliable network connectivity.
- Designed, configured, and maintained LAN/WAN networks to ensure high availability, performance, and security.
- Monitored network performance, troubleshooted connectivity issues, and implemented preventive maintenance to minimize downtime.
- Managed network switches and access points.
- Documented network configurations, procedures, and incident reports for operational efficiency.

GDX Group

L1 System Support Engineer

Feb-2025 - Feb-2026

Worked in a third-party role at Adani Enterprises Ltd. – Suliari Coal Mine

- Provided first-level technical support for hardware, software, network, and system-related issues.
- Monitored and troubleshooted LAN/WAN connectivity, switches, and basic network infrastructure.
- Managed user accounts, password resets, and access permissions.
- Maintained CCTV systems, monitored surveillance operations, and ensured smooth functioning of security devices.

Logical SoftTech Pvt Ltd

Flutter Developer

Oct-2023 - Dec-2024

- Developed and maintained cross-platform mobile applications using Flutter and Dart for Android and iOS.
- Implemented responsive UI designs, reusable widgets, and state management for smooth user experience.
- Integrated REST APIs, handled data storage, and ensured secure app performance.
- Collaborated with backend and design teams to deliver scalable and user-focused applications.
- Debugged, tested, and optimized applications for performance, reliability, and usability.

CRTD technology

Junior Python developer (Intern)

- Developed and maintained web applications using Python, Django, and Django REST Framework.
- Built and consumed RESTful APIs, ensuring secure authentication and efficient data handling.
- Designed and optimized relational databases (PostgreSQL/MySQL) for scalability and performance.
- Implemented MVC architecture, reusable components, and clean code practices.

EDUCATION

RGPV Bhopal

B-Tech In Computer science Engineering - 7.9

Aug-2019 - Jun-23

- Gained strong foundation in computer networks, data structures, operating systems, database management systems, and software engineering.
- Developed practical skills in programming, web and mobile application development, and problem-solving.
- Worked on academic projects involving full-stack development, data analysis, and data visualization.
- Built analytical thinking, teamwork, and technical documentation skills through labs and project work.

PROJECTS

E-Commerce Mobile Application – Grocery & Vegetables Delivery

- Developed a complete multi-vendor e-commerce application for grocery and vegetable delivery.
- Built the front end using Flutter, implementing responsive UI, product listings, cart, and order flow.
- Developed the back end using Laravel, including REST APIs, authentication, vendor management, and order processing.
- Implemented features such as user registration, vendor onboarding, product management, real-time order status, and payment integration.
- Ensured secure data handling, optimized performance, and smooth communication between Flutter front end and Laravel back end.

Service Booking Mobile Application

- Developed a service booking mobile application allowing users to book services such as maintenance, repair, or on-demand support.
- Built the front end using Flutter with intuitive UI, service listings, booking schedules, and user profiles.
- Implemented the back end using Laravel, including REST APIs, authentication, service provider management, and booking workflows.
- Integrated features like real-time booking status, notifications, and secure data handling.
- Optimized application performance and ensured a smooth user experience across devices.

SKILLS

Platforms

- Linux / Windows
- Genetec Security Desk

Networking

- LAN/WAN, TCP/IP, DNS, DHCP
- Routers, Switches
- Network Monitoring & Troubleshooting
- CCTV & Surveillance Systems

Programming & Development

- Flutter, Dart
- PHP, Laravel
- REST API Development & Integration
- HTML, CSS, JavaScript

Databases

- MySQL
- Database Design & Management

Data Visualization

- Dashboard Development
- Data Analysis & Visual Reporting

Tools

- Git & Version Control
- Postman

Soft Skills

- Problem Solving
- Team Collaboration
- Documentation & Reporting
- Time Management

CERTIFICATE

Data visualization with Power BI

- Gained hands-on experience in creating interactive dashboards, using DAX functions, and transforming raw data into visual insights for decision-making.
